DELIVERING QUALITY FIBER OPTIC EQUIPMENT AROUND THE WORLD

Established in Phoenix, AZ in 1992 as a fiber optic polishing and inspection equipment manufacturer, TrueView has grown to a product line of over 50 quality products and multiple US patents. TrueView products is recognized by some of the largest fiber optic manufacturing and distribution companies with over 35 distributors in the US alone. Our versatile fiber inspection microscope is recognized around the world and is featured in over 20 industry leading catalogs including FIS, 3M, FNT, and Panduit. We also manufacture continuity testers, workstations, polishing pucks, tool kits, polishing plate and pad assemblies, and much more. TrueView continues to design new innovative equipment based on fiber optic technicians expectations for comfort, reliability, and versatility.

Featured Products

12-9025: 100X Fiber Inspection Microscope

Our fiber inspection microscope is recognized worldwide for its durability and versatility with easily swappable adapter heads for nearly any fiber connector style manufactured today. A must for any fiber optic technician kit. See imperfections as well as with a 200 or 400 power inspection scope with a simple lightweight 100 power inspection scope. Convenient 8X magnification loupe on back allows quick connector end-face examination.

MR-1198: Rack Mount Toolcase/Workstation

The TelePROkit rack-mountable workstation easily attaches to telecom racks and has a slide out drawer for convenient tool storage. The flat work surface is composed of a chemical and heat resistant PVC polymer and can hold up to 150 lbs. Drawers available in 2" and 4" deep with custom designed foam inserts to protect stripping tools, polishing fixtures and all tools necessary for basic connector installation. All workstations have a lock and key on the drawer to protect expensive tools from theft. Carries like a briefcase, straps stretch across front and lock to keep drawer securely in place.

Fiber Inspection Scope

12-9025: Flat plate scope offers 100x viewing of ST, SC or FC connectors with non-ferrule scratching SureGrip technology

12AP-9025: Angle view scope offers an unprecedented laser-safe view of ST/SC/FC connectors for gigabit quality inspections.

16VPUA-9025: Scope with adapter for viewing VF45 connectors at an angle on the puck

16VPL-9025: Scope with adapter for viewing of VF45 connectors in the plug

14MJA-9025: Scope with adapter for viewing MT-RJ connectors at an angle

14MTP-9025: Scope with MTP adapter for un housed chip view of connectors

14MUA-9025: Scope with adapter for viewing MU connectors at an angle

14MT-9025: Scope with MT adapter for un housed chip view of connectors

15LCS-9025: Scope with adapter for viewing of LC simplex connector

15LCA-9025: Scope with adapter for viewing LC simplex connectors at an angle

15LCD-9025: Scope with adapter for viewing LC duplex connectors

TelePROkit Workstation

MR-4: 4" deep drawer helps to keep tools right at your fingertips. Buy extra drawers to separate tools by specific applications.

MR1198: TelePROkit toolcase/workstation holds your tools (not included) and easily fits any standard telecom rack. Constructed from a high-grade extruded aluminum alloy, the nearly indestructible TelePROkit is a 13" x 15" workstation and tool case all rolled into one portable, time saving device. With a chemical and heat resistant PVC work surface, this tool case provides ample work space. The quick-disconnect strap on the case handle gives access to the locked drawer, keeps the tray secure, and doubles as an adjustable handle or shoulder strap. Fits any 19" or 23" telecom rack. It only takes seconds to attach and you have an open surface to terminate connectors, splice or even perform inspections on installed fiber lines.

MR-L1: Ladder Mount Kit enables TelePROkit to be attached to any horizontal or vertical bar securely. Attaches to OSP pedestals, aerial bucket railings, ladders, and fences.

Other Quality Products

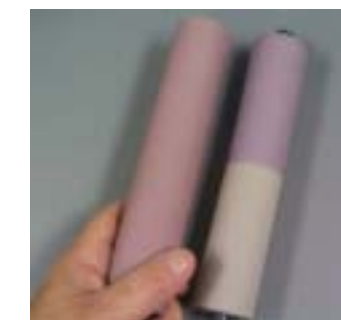

PSF22: Pocket light source provides a pre-focused white light that is easily detectable up to 2,000 meters. Plastic molded head securely holds ST/SC/FC heads for continuity inspection.

B9025BF: Pre-view a cleave before making a mechanical splice junction. Used with our 100x scope, the side view ensures fiber cleave angle quality.

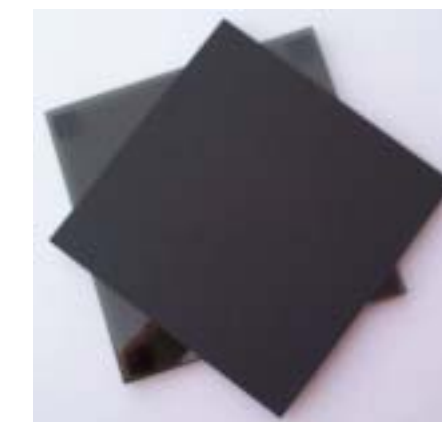

DP200: Diamond coating on this lightweight polishing puck provides extended use on ST, SC or FC connectors

35RR1, 35RR2: 20' roll of 3 micron (RR1) or 1 & 5 micron (RR2) replacement rolls of polishing film for the FPS02 system.

FPS02: The continuous polishing system keeps 20 feet of 2 in 1 or 1 step lapping film contamination free. Film sold separately.

SAP798: Skid free, shatter proof acrylic polishing plate with standard duro rubber pad. 5.75" square.

798SQ3, 798SQ5: 6" x 6" sheets of 2 step film in 3 & .3 micron (SQ3), or 5 & 1 micron (SQ5) polishing surface. 25 sheets/package.

TC500: This Titanium coated, lightweight polishing puck provides a smooth, controlled feel for polishing ST, SC or FC

DP200: Diamond coating on this lightweight polishing puck provides extended use on ST, SC or FC connectors

LC705: Composed of a Delrin plastic polymer, this polishing puck performs several thousand flawless LC connector polishes
