

Features

- Able to mount to any telecom rack quick and easy
- Durable design can hold over 150 pounds of equipment
- Slide out drawer with specially designed foam insert holds tools securely within

TelePROkit

THE LATEST IN INSTALLER TECHNOLOGY

The universal 'rack mountable' work station tool case drastically improves fiber or copper installation time by cutting setup and demobilization to seconds. Whether terminating fiber optic or copper cable, all the technician's hand tools are conveniently stored in a large, slide-out ABS plastic drawer. Constructed from a high grade aluminum extruded alloy, the nearly indestructible TelePROkit is a tool case, brief case and surface, ladder or rack mountable workstation all rolled into one.

- Provides large chemical-resistant work surface
- Designed to hold either Fiber or Copper hand Tools
- Can easily attach to ladders, vertical or horizontal bars, OSP pedestals, and a lot more with optional MR-L1 mount

The MR1198 comes with a pre-configured top shelf. Select the hand tools that you use most often when working at a rack and lay them out on top foam in your preferred sequence. The lower space is designed for you to configure your own layouts.

Quick-disconnect latch, built into the heavy-duty brief case/shoulder strap, activates the sliding drawer feature. Two inch deep drawer assembly (OPTIONAL 4" AVAILABLE) is split into an upper and lower compartment layout. Chemical resistant work surface provides nearly 200 square inches for ovens, test equipment, laptop computer and frequently used hand tools.

Easily attaches to all telecom racks

Two aluminum retractable bars extend mounting application from 17" on center to any desired position up to 26". Heavy-duty bars are key holed for ease of mounting and are capable of supporting up to a 150 pound load. Mount anywhere on telecommunication racks within inches of work to be performed. MR1198 can also be direct wall mounted, ladder mounted or pedestal mounted (with optional universal mounting adapter).

Copper Kits

Modular jack punchdown and category cable termination made easy with the sturdy work surface.

Fiber termination requires numerous small hand tools and a stable large work surface. TelePROkit keeps everything organized while still providing plenty of workspace.

Fiber Kits

Construction:

Constructed of solid, Chemical-proof PVC plastic formed into a flat surface. Case constructed of high grade aluminum extruded alloy.

Dimensions: 16" x 14" x 2 1/4"

Shipping Weight: 2.5 pounds
